Conflict of Interest

- The following course modules are intended to provide an overview of the treatment of PTSD, both in general and within military populations. As a CE course, these modules are intended as an overview only, and not an in-depth review. Individuals interested in more comprehensive coverage of PTSD treatment are encouraged to pursue further formal training, such as that offered through a university or specialized training program.
- Neither the CPA nor the presenters receive any commercial support for this CE program. Any opinions presented in the course are solely those of the presenters.
