THE 2016 *CANADIAN JOURNAL OF BEHAVIOURAL SCIENCE* BEST ARTICLE AWARD

The Canadian Psychological Association (CPA) is pleased to announce that the award for the best paper published in *Canadian Psychology* (*CP*) in 2016 goes to Rafaël Laurin for his article, "Awareness Level of Gender Stereotype and Stereotype Threat Effect on Ingroup Favoritism Bias in Mixed-Gender Basketball Teams" (2016, Vol. 48, No. 2, 155–161).

The award will be presented at the CPA's 2017 National Convention (http://www.cpa.ca/Convention/) in June in Toronto, ON, and is accompanied by a $1000 prize.

About the Journal

The *Canadian Journal of Behavioural Science* publishes original empirical research in the following areas of psychology:

- social (family and relationships, parenting, personality, community, attitudes and behaviour)

- development across the life span (children and youth, aging, seniors/older adults)

- school and educational (achievement, testing, cognition)

- industrial/organizational (management, group performance, conflict resolution)

- clinical and abnormal (depression, psychopathology, neuropsychological, counselling)

- environmental (weather, built environment, lighting)

- diversity and equity inclusion (gender, sexual orientation and gender identity)

Looking at psychology outside of the lab and in the community, the journal welcomes articles that are cross-cutting, either by looking at an issue from multiple perspectives and/or from across different psychological subject matter areas. Brief reports with theoretical and practical implications may be considered, particularly psychometric reports and to disseminate Canadian norms or forms for standardized tests.
