Dr. Candice Monson and the CPT Training Team are pleased to present two online CPT workshops, a **2-day Foundational Training** and a **1-day Group Training**, for healthcare practitioners and trainees in psychology, social work, nursing, counselling, medicine, and related fields.

The workshops will be hosted live via Zoom with the ability to ask real-time interactive questions of the presenters.

**Workshop**

**Cognitive Processing Therapy**

**Evidence-Based Treatment for PTSD**

---

**PRESENTERS**

**Candice Monson, PhD, C.Psych.**

Dr. Monson is Professor of Psychology at Ryerson University. She is one of the foremost experts on traumatic stress and the use of individual and conjoint therapies for PTSD. Dr. Monson has received numerous awards for her clinical, teaching, and research contributions, including Fellow status in the Canadian and American Psychological Associations and Association of Behavioral and Cognitive Therapies, and induction into the Royal Society of Canada. Dr. Monson has co-authored 7 books, including the treatment manuals *Cognitive Processing Therapy: A Comprehensive Manual* and *Cognitive-Behavioral Conjoint Therapy for PTSD*. Dr. Monson is well-known for her clinical training and dissemination efforts.

**Philippe Shnaider, PhD, C.Psych.**

Dr. Shnaider is a Clinical Psychologist in private practice and an Assistant Professor (PT) in the Department of Psychiatry and Behavioural Neurosciences at McMaster University. He previously managed and worked as a Psychologist at the Anxiety Treatment and Research Clinic at St. Joseph’s Healthcare Hamilton. He is the co-author of *Treating PTSD with Cognitive-Behavioral Therapies: Interventions That Work*, and has published several peer reviewed publications and book chapters. His research focuses on examining individual, couple, and group cognitive behavioural therapies for anxiety- and trauma-related disorders. Dr. Shnaider is actively involved in efforts to train clinicians in evidence-based interventions for PTSD.

---

**WORKSHOP OVERVIEW**

About 10% of North Americans are diagnosed with PTSD in their lifetime, and most will have comorbid conditions (e.g., depression, substance use, dissociation). Fortunately, effective psychotherapies exist for treating these conditions. Cognitive Processing Therapy (CPT) is a recommended first-line therapy in current treatment guidelines worldwide. There are 4 primary targets in CPT: 1) psychoeducation about PTSD from a cognitive perspective; 2) cognitive-behavioural self-monitoring; 3) cognitive interventions specific to trauma appraisals; 4) cognitive interventions aimed at overgeneralized beliefs emanating from traumatization.

This workshop serves as a foundational training in CPT, highlighting the most recent research and changes in the protocol with the recent publication of the comprehensive manual (Resick, Monson, & Chard, 2017). Participants will receive instruction in the theoretical underpinnings of CPT to facilitate individual case conceptualization, session-by-session review of the protocol, demonstrations with video-recorded materials from actual cases, personal experience with the therapy materials through role-plays, and discussion of common problems encountered.

---

**Mon-Tue, September 13-14, 2021**

(2-day Foundational Training)

**Wed, September 22, 2021**

(1-day optional Group Training)

10:00am – 5:45pm Eastern

with one-hour lunch and three 15-minute breaks

These trainings will be held online via Zoom (links to be provided prior to workshop)
Agenda for Day 1 (Sep 13/2021):
- Symptoms of PTSD and the theory underlying CPT
- Research outcomes from CPT treatment trials
- Overview of CPT manual and forms
- Pretreatment issues, recommended assessment measures, and structuring sessions
- Review of sessions 1-3

Agenda for Day 2 (Sep 14/2021):
- Review of sessions 4-12
- CPT with Written Accounts
- Common challenges and strategies for overcoming them

Agenda for Group Training (Sep 22/2021):
- Research on Group CPT
- Preparing for Group CPT
- Group delivery of CPT (Sessions 1-12) including aftercare
- Common challenges and errors in Group delivery of CPT

Participants will learn:
- The theory underlying CPT
- The evidence base that supports the use of CPT in treating PTSD and its common comorbidities
- Recommended assessment strategies to determine clients

Learning objectives cont'd:
- appropriate for CPT and to monitor outcomes
- The session-by-session CPT protocol
- Common challenges to implementing CPT (e.g., client adherence, managing comorbidities) and strategies for overcoming them
- For Group: learn about the evidence supporting the use of group CPT; discuss how the session-by-session protocol is applied to group delivery; learn how to apply Socratic questions in Group; identify common challenges and ways to address

COURSE MATERIAL

Click URL to register:
https://candicemonson.com/collections/workshops

Registration Fees:
2-day (Sep 13-14) Foundational Training:
Professional, Early Bird (to Aug 20, 2021) Cdn $549+tax*
Professional, Regular
MD Resident/Postdoc
Student (valid ID required**) Cdn $299+tax

1-day (Sep 22) Group Training***:
Professional, Regular Cdn $299+tax
Student/Postdoc (valid ID required**) Cdn $199+tax

*GST/HST to be charged where applicable.
**Email (training@candicemonson.com) or fax (1-866-344-1410) a copy of your Student ID upon registration.
***If you will not be attending the 2-day foundational portion of this workshop, attendance at a prior 2-day CPT workshop is required to register for the group training day.

REGISTRATION

To ensure connectivity, test internet connection (built-in or USB plug-in or wireless Bluetooth). To ensure connectivity, test meetings will be held prior to workshop. Phone-in option will be available as back-up for audio.

HARDWARE REQUIREMENTS

This workshop meets the requirements toward CPT Provider status and placement on our Provider Roster, https://cptforptsd.com/cpt-provider-roster/

CE CREDITS

Candice Monson, PhD, is approved by the Canadian Psychological Association (CPA) to offer Continuing Education credits to Canadian psychologists. For US clinicians and other licensed professionals, please check with your licensing board to determine acceptability of CPA CE credits for this learning activity.

This program offers 6 CE credits per day with full attendance. Partial CE credit is not offered. Participants will be eligible to receive CE credits upon successfully completing an online post-training survey/knowledge evaluation.

Participants are encouraged to read the newest version of the CPT manual prior to the workshop, available at Guilford Press here: https://tinyurl.com/CPTmanual

POST-WORKSHOP CONSULTATION:
Opportunities for additional learning via post-workshop consultation will be discussed during the training, including information related to achieving CPT Provider status.

This workshop meets the requirements toward CPT Provider status and placement on our Provider Roster, https://cptforptsd.com/cpt-provider-roster/
