Ontario Primary Health Care System models and their Impact on Research - Dr. Richard Glazier, Institute of Clinical Evaluative Studies (ICES) 2. Overview of Item Response Analysis: Applied to Instruments to Evaluate Primary Healthcare - Dr. Jeannie Haggerty, McGill University
4:00 pm	Research Day Adjourns

ABSTRACT SUBMISSION DEADLINE:

May 1, 2012

REGISTRATION DEADLINE

May 22, 2011

The Primary Health Care System (PHCS) Program, an Ontario-wide network of primary health care researchers established in late 2009, is sponsoring this event. The PHCS Program, led by Dr. Moira Stewart, is funded by the Ontario Ministry of Health and Long-Term Care (MOHLTC).

The mission of the PHCS Program is:

- To work with the MOHLTC of Ontario to improve the co-ordination and effectiveness of Primary Health Care research and knowledge translation

LEARNING OBJECTIVES for the conference:

- To provide a forum for presentation of innovative activity or original research in primary health care, either in progress or completed.
- To facilitate dialogue among a variety of health care-related disciplines and health system policy makers in Ontario.
- To provide an opportunity for the enhancement of research skills, through workshops, oral and poster presentations and through the informal exchange of information among peers.

Who Should Attend?

- Ontario researchers interested in primary health care
- Decision-makers/clinicians practicing in primary health care
- Policy-makers in the area of primary health care

Please see the Trillium Primary Health Care Research Day website for more information:

www.trilliumresearchday.com

Family Medicine residents and graduate students from relevant primary health care disciplines are encouraged to attend. **Limited travel grants available for presenting students/residents.** Work can be ‘in progress’.
