Rank/Title	Research Associate (non-tenure track)
Department/ School/ Faculty	Psychology/ Faculty of Arts
Location	UBC Campus

Part 1: Position Description:

Invites applications for the position, indicating rank & term; academic background/qualifications required; duties as per applicable UBC criteria (Teaching, Research, Service)

The Department of Psychology at the University of British Columbia invites applications for the position of a Research Associate. Required qualifications are a PhD in Clinical Psychology and a strong record of research productivity in the area of clinical neuroscience. The successful candidate will take a lead role in a study of reward-related brain activity in Gambling Disorder using hybrid PET-MRI and will be expected to contribute to developing an innovative program of neurobehavioral and clinical research using this novel technology. Expertise in positron emission tomography (PET) using dopamine-specific tracers is, therefore, essential, as is research and/ or clinical expertise in Gambling Disorder and psychological assessment. Postdoctoral experience is highly desirable, as is expertise in behavioural/ neuroeconomics and knowledge of advanced PET analytic methods. The successful candidate will have a demonstrated excellence in and supervision of undergraduate and graduate students and will be expected to participate fully in the supervision of graduate and undergraduate trainees. They will also be required to work as part of a multidisciplinary team interact effectively with collaborators from other departments.
