

The Saskatchewan Health Authority is seeking PhD Psychologists who are interested in working in **Saskatoon, Saskatchewan**.

The Saskatchewan Health Authority is the largest organization in Saskatchewan, employing over 44,000 employees and physicians responsible for the delivery of high quality and timely health care for the entire province.

Saskatoon is the largest city in the province, with a population of approximately 270,000 people. The Saskatchewan Health Authority operates 3 hospitals in Saskatoon, including the brand new Jim Pattison Children's Hospital, the first hospital of its kind in the province. In addition to our hospitals, we also operate numerous long term care homes, primary health care sites, public health centres, mental health and addictions centres, and community-based facilities.

Within the context of the SHA's client and family centered care model and in accordance with the established standards of professional practice outlined by the Saskatchewan College of Psychologists, these positions will provide health psychological services.

The Saskatchewan Health Authority offers competitive wages, a defined benefit pension plan, life and disability insurance, an employee and family assistance program, and extended health and dental coverage.

**Position details:**

- \$51.356 to \$62.643 (5-step range);
- Permanent full time;
- Represented by the Health Sciences Association of Saskatchewan (HSAS).

**Qualifications:**

- PhD in Clinical Psychology;
- Registered or eligible for registration with the Saskatchewan College of Psychologists.

**Knowledge, skills, abilities, and experience:**

- Broad assessment, treatment, and consultation expertise in areas relating to the impact of psycho-social factors on medical problems, health and rehabilitation;
- Ability to work independently and as a member of a multidisciplinary team;
- Interest in behaviour and pain management strategies;
- Experience with pediatric patients with developmental delays and mental health challenges;
- or
- Experience with adult patients with a broad range of mental health issues, including depression, anxiety, PTSD, loss/change, family and marital issues, pain, and health behaviour.
-
