WE'RE HIRING!
Psychologist B

Vancouver Coastal Health is looking for a Psychologist join the Solid Organ Transplant department at Vancouver General Hospital.

About the Post-Transplant Clinic

Patients diagnosed with end-stage liver, lung and kidney disease are seen throughout the various stages of transplantation. The primary mandate of psychologists within the multidisciplinary liver, lung, and kidney transplant teams is to focus on pre-transplant assessments, for both outpatients and inpatients as well as assessment of living donors. In addition, inpatients and outpatients, in both the pre-transplant and post-transplant phases, are seen for intervention and consultation. The duration of intervention tends to be brief, and focuses on maximizing patients’ psychological adjustment from the pre-transplant waiting period, through the post-operative, in-hospital phase, and on through to long-term adjustment.

About the job:

Practicing within the area of health psychology the psychologist will have the opportunity to work with physicians, nurses, pharmacists, social workers, chaplain, and dietician. The psychologist will attend clinical/case conferences, provide formal and informal consultations, evidence based psychotherapeutic interventions, contribute to clinical programming, participate in quality improvement and risk management activities, provide clinical teaching and supervision to Psychology Residents and students, conduct and participate in research.

Education & Experience:

- Ph.D. in Clinical Psychology from a recognized university.
- Two (2) years recent related experience in therapeutic, diagnostic and consultation services in the designated scope of practice areas of mental health & addiction services such as experience working with individuals with mental health issues, substance misuse, anxiety and mood disorders and post traumatic stress disorder.
- Current registration with the College of Psychologists of British Columbia or registration with the College within one year of employment.
