Psychological Supervision and Collaboration with Renew Neurotherapy

Renew Neurotherapy is searching for psychologists to collaborate with our teams in Ottawa, and Pembroke and Petawawa, ON.

**Pembroke and Petawawa in the Ottawa Valley**

For nature-lovers, and those searching for a slower pace of life and a beautiful place to raise a family, the Pembroke and Petawawa area in the Ottawa Valley is worth a second look! Only 1.5 hours away from Ottawa, the Pembroke and Petawawa area offers the best of both worlds – a friendly, slow-paced, well-serviced and affordable local community, and an easy day-trip access to a larger centre for world-class medical care, arts and culture, dining, shopping and entertainment.

Pembroke and Petawawa are underserviced, high-need locations in terms of psychological services. Garrison Petawawa is located in Petawawa and employs over 5000 members, with a high veteran population choosing to remain in the area following release from military service. Mental health services are in high demand.

**Ottawa**

Ottawa is the capital of Canada with a vibrant arts, dining, shopping and entertainment scene and world-class medical care. Ottawa is home to four professional sports teams (Ottawa Senators of the National Hockey League; the Ottawa Redblacks of the Canadian Football League; the Ottawa Champions of the Canadian American Association of Professional Baseball; and Atlético Ottawa of the Canadian Premier League), seven national museums, and hosts many of Canada’s large annual festivals, including Bluesfest, the Ottawa Chamber Music Festival and Winterlude. Access to outdoor activities ranging from skiing to white water rafting and hiking are all within a 1-hour drive.

**Collaboration**

Renew is searching for psychologists who are interested in providing on-site psychological supervision services in Ottawa and Pembroke/Petawawa for neurofeedback therapy for veterans.

- Clinic space will be offered to qualified psychologists in our current Pembroke clinic at no cost for the initial 6 months as they build their practice.
- Psychologists are invited to build and maintain their own caseloads and practice, working from the Renew locations.
- Renew will provide networking support as the psychologists build their practice.
- Pertinent neurofeedback training and mentoring services, education, and resources will be provided at no cost.
- Renew is open to collaboration and discussion regarding varying options and scenarios to ensure that the psychologists’ needs are specifically addressed.
- Renew will prioritize process planning with the psychologists to ensure that college-mandated supervision regulations are met.

Learn more about Renew Neurotherapy below!

Renew Neurotherapy (www.renewneurotherapy.com) is an interdisciplinary community and clinic-based rehabilitation practice. Services are provided in person in Eastern and Northeastern Ontario, and online, throughout the province of Ontario. Physical clinics are based in Ottawa, Pembroke and North Bay; however, a large portion of caseload is community-based and online. Our team is comprised of occupational therapists, psychotherapists and neurofeedback associates.

At Renew, our goal is to help our clients feel better, faster! We value empathy and kindness in our therapy team. We are client-focused, non-judgmental, and offer a supportive stress-free environment. We use comprehensive brain-based, science-supported therapies, techniques and resources customized to promote client recovery.

We use a neuroscience foundation to understand, explain and address mental health, learning, pain and behavioural issues. Our primary areas of practice include:

- Mental health support
- Brain injury and concussion rehabilitation
- Complex pain
- Learning disorders support
- Sleep regulation
- ADL/IADL (life skills development)
- Neurofeedback therapy

Uniquely, Renew Neurotherapy incorporates research-based neuromodulation techniques (neurofeedback) alongside traditional interventions to maximize client recovery.
