Psychologist I
Location: Red Deer, Alberta, Canada
Requisition #: ALB00250741
Salary Range: $41.58 - $55.25 per hour
Job Type: Regular Part Time

Your Opportunity:
This clinical position works with or within teams to provide psychology services for patients with complex and multi-dimensional medical, psychological, interpersonal, environmental and/or instrumental needs. The position involves provision of advanced clinical services (including psychological assessment, diagnosis and/or intervention); consultation and education to the inter-professional team and patients/families, and supervision of psychology residents, masters level interns, provisionally registered psychologists, psychometrists and team members as appropriate and required. A specialization in treatment of complex families and youth, particularly in working with families living with trauma, will be an asset to the position.

You will be patient centered and family centered in your care practices, following AHS Values and Policies. Flexibility in hours for evening and weekend service delivery to meet client needs will be required. The expectation will be to support evening group facilitation and meet families occasionally during evening and weekend times. A flex schedule will be discussed upon hire. Red Deer has an overarching Children’s Team focus, supporting all other programs in the portfolio as needed. Multisite is listed to include Unit 39 at the Red Deer Hospital (youth acute stabilization), PChAD (Youth Detox and Stabilization) at Michener Bend, the outpatient clinic in Red Deer (currently at the provincial building downtown) and any other future programs.

Description:
As a Psychologist I, you will work with or within teams to provide a range of standard level psychology services to patients and their families within the established standards, directives, and policies for the work environment. Your services may include: psychological screening and/or assessment, diagnosis, interventions, rehabilitation, prevention and promotion, as well as education activities. You will collaborate with the multi-disciplinary team of healthcare professionals in planning and implementing services that align with best practice and ethical and professional standards.

You will provide input to the interprofessional team related to psychological factors, barriers and dynamics that influence client treatment planning, participation, outcomes and team functioning, and consults/collaborates with teams and community services. Your duties may also include providing supervision to psychometrists, provisional psychologists and/or masters level psychology students, and providing input into program, policy and/or procedure development in addition to participating in formal research initiatives.

Required Qualifications:
Completion of master's degree in Psychology in an applied area relevant to the practice setting from an accredited university program. Active or eligible for registration with the College of Alberta Psychologists (CAP).
**Additional Required Qualifications:**
Psychological services, including risk assessment, formal assessment, individual therapy and development and facilitation of educational/psychoeducational and psychotherapy groups. Demonstrated leadership, organizational, and clinical skills (individual, family, assessment and group). Must be coupled with the ability to be self-directed, highly motivated and work effectively within a team environment. Five years’ experience in working with multi-systemic complex families from a trauma informed perspective is required. A strong working relationship and ability to collaborate with the program Psychiatrists will be required for this position. Experience in team development and program development will be required for the start-up of the program.

**Preferred Qualifications:**
Strong technological skills considered an asset regarding the use of computers, Microsoft Suite, and AHS internal software. Experience working in an inpatient program is considered an asset.
