HealthJobsPEI.ca/Psychologist**

**Psychologist Team Lead: Community
Mental Health and Addictions**

**Psychologist:
Student Wellbeing Program**

“Our community-first approach to providing meaningful mental health and addictions care is about more than bricks and mortar. By working together with health care providers and community partners, we will ensure that every Islander experiencing mental health and addictions challenges – as well as the loved ones who support them – has access to the programs and services they need in a timely manner”

Hon. Dennis King, Premier of Prince Edward Island

Health PEI

Mental Health & Addictions Redevelopment Project

We are building a community-first system of care that will allow Islanders to receive the care you need, when you need it, in the most appropriate setting as close to home as possible.

The future of MH&A services and care is dependent upon partners continuing to work together, including care providers from across the health care system; clients, families, and caregivers; community-based services; and emergency and crisis services to design a high-quality care delivery system.

Experience a new way of life on Prince Edward Island!

PEI is Canada's fastest growing province and has a current population of 174,000. Nestled on the East Coast, PEI boasts more than 1,100km of shoreline, a fantastic culinary scene and a vibrant cultural community.

With our average commute time of 15 minutes to work, living on the Island allows you to cultivate the balance between your career and home life seamlessly. Whether you prefer a rural setting, would like to be close to the ocean or feel more at home in a urban condo downtown - we have it all.

Talk to our team! Our recruitment coordinators would love to talk with you about life on the Island and the many opportunities available for Clinical Psychologists.
