

Registered Psychologist - Part-Time | 16- 20 hrs/month | \$200 hr

Location: Toronto, ON (Hybrid or In-Person)

Are you a psychologist who loves clinical work, but not the business side of private practice?

Do you want guaranteed monthly income, a supportive team, and a role that offers mentorship, growth, and long-term stability?

This is a rare opportunity to focus on meaningful, high-quality work without worrying about marketing or managing your own caseload.

About the Role

We're looking for a Supervising Psychologist to join our well-established, integrative psychology and healthcare clinic. This part-time position offers guaranteed compensation and a consistent monthly rhythm, ideal for someone who wants to supervise, collaborate, and grow without burnout.

In this role, you'll provide clinical oversight and structured supervision to Psychometrists, RPQs and practicum students in the following areas:

- Motor Vehicle Accident (MVA) assessments
- ADHD assessments
- Psychoeducational evaluations
- General psychological assessments
- Supervision of the treatment of the diagnosis

You'll collaborate regularly with a senior psychologist with over 20 years of experience, and have access to ongoing consultation and mentorship—particularly for ADHD and psychoeducational files.

Experience working with adolescents and adults is preferred.

Experience with ADHD and psychoeducational assessments is an asset—but consultation and support will be provided as part of your onboarding.

A Continued Learning Opportunity

This position is ideal for an early-career psychologist who wants to deepen their skills in clinical supervision and assessment—while benefiting from the support and structure of a trusted clinic. You'll have opportunities to learn other types of assessments, expand your confidence in oversight roles, and receive professional mentorship in a collaborative setting. Opportunity for private client referral.

What We Offer

- Guaranteed monthly income
- Optional employee benefits (health/dental) if hired as an employee
- Private office space, full admin support, and referral systems
- No marketing, no caseload building, no stress
- A long-term, stable role with room to grow and expand

You're a Great Fit If You Are...

- A Registered Psychologist (CPBAO) in good standing
- Confident working with adolescents and adult
- Experienced in assessments (MVA, ADHD, psychoeducational), or willing to learn

- Passionate about mentorship, clinical ethics, and quality client care
- Looking for a steady, structured, supportive role—without the headaches of private practice
- Interested in continued professional development alongside a seasoned team

Why McDowall?

At McDowall Integrative Psychology & Healthcare, we believe in ethical care, integrity, and balance. We're building a team of like-minded clinicians who want to do good work and be part of something meaningful—without the chaos or isolation of solo practice.

Whether you're an early-career psychologist looking to grow, or a more experienced clinician wanting to stay engaged in a sustainable way, this role offers income, mentorship, support, and professional community.
